

Guide to RTI Contracts and Collaboration with the National Institutes of Health

RTI International's mission to improve the human condition by turning knowledge into practice closely parallels NIH's mission to support scientific studies that turn discovery into health. Over the past 50 years, RTI has collaborated with NIH on projects for most of its institutes, centers, and offices. We have made substantial contributions to seminal research on cancer treatments, maternal and children's health, HIV prevention, and environmental health. Our multidisciplinary team of scientists, statisticians, analysts, and project managers help NIH address scientific priorities through high-quality research and technical services.

We also offer extensive experience in managing multiyear/multitask grants, cooperative agreements, and contracts that encompass methods development, laboratory-based studies, coordinating centers, data repositories, and technical support. Through this work, RTI has gained a thorough understanding of NIH's programs, organizational structure, and operations.

Advertising and Integrated Marketing Solutions (AIMS) Schedule

AIMS Contract: GS-07F-0112U

Contracting Officer: Your center's contract specialist

RTI Contact

Lauren McCormack
919.541.6277, lmac@rti.org

Alternate RTI Contact

Katherine Treiman
301.762.2677, ktreiman@rti.org

Services:

- Market Research and Analysis (SIN 541-4A)
- Video and Film Production (SIN 541-4B)

- Exhibit Design and Implementation (SIN 541-4C)
- Integrated Marketing Services (SIN 541-5)

Contract End Date: November 30, 2017 (expected)

Chief Information Officer—Solutions and Partners 3 (CIO-SP3)

Sponsored by NIH, CIO-SP3 is an IDIQ contract providing total information technology solutions for all federal organizations. It offers fast turnaround, multiyear tasking and no limit on hardware and software purchases. With task areas that meet scientific, health, administrative, operational, managerial, and information management requirements, CIO-SP3 has the depth and breadth of scope that complex solutions require.

RTI is a subcontractor to Computer Sciences Corporation (CSC; full and open) and Quasars (small business). RTI expects to contribute services related to business and informatics (including analytics and laboratory science).

National Institutes of Health Conference and Administrative Travel Services II (NIHCATS II)

NIH Contract: HHSN263201100038I

Contracting Officer

Lisa Adams
301.496.7792, AdamsL@odepsm1.od.nih.gov

RTI Project Director

Debra Kulik
301.770.8222, dkulik@rti.org

Contract End Date: November 14, 2016

This IDIQ can be used by any agency or office within the Department of Health and Human Services to solicit support for meetings, conferences, and workshops. This vehicle allows both large and small businesses to respond to task orders. Tasks can include making a payment to support a specific conference on the government's behalf; providing specified logistics, planning, and administrative support; and developing content. Meetings, conferences, and workshops can take place in the United States or throughout the world.

How to Use GSA Contracts

The GSA offers all federal agencies contracts or schedules that can be used to purchase specific services for a given period at competitive prices. RTI is a GSA-certified vendor, federally qualified to provide a specific set of services within several schedules.

Mission-Oriented Business Integrated Services (MOBIS)

MOBIS Contract: GS-10F-0097L (SIN 874)

Contract End Date: November 30, 2015

Contracting Officer: Your center's contract specialist

Comprehensive, Multidisciplinary Research Expertise

Our survey and consultation expertise is leveraged across a broad base of RTI scientific research activities and includes the design, development, and application of advanced tools and methods in the following disciplines:

- International development—Providing extensive capabilities in policy support, applied research and analysis, and other technical expertise in strategic planning, institutional development, performance management, information systems, and training.
- Health—Offering clients a spectrum of innovative services that encompass drug discovery and development, outcomes research, product valuation, public health, and health policy research.
- Environmental research services—Setting environmental standards, conducting research, and providing scientific, technical, and policy analysis.
- Education and training—Improving the quality of education programs in the United States and other countries through research, program evaluation, training, and policy analysis.
- Advanced technology—Bringing innovative ideas from the laboratory into practical use and providing intellectual asset management services.
- Economic and social research—Building human institutional capacity and promoting sustainable economic and social development throughout the world.

Survey and Data Services Expertise

With a staff of highly skilled researchers using advanced data collection systems and techniques, RTI can offer broad-based survey services for federal projects, including the following:

- Survey research and services—Designing, developing, evaluating, and implementing standard and custom survey instruments.
- Data collection and survey research innovations—Providing a full range of survey data collection innovations and services from one-on-one personal interviewing to leading-edge, computer-assisted methodologies.
- Data coordination and management—Managing hard-copy and electronic data used in clinical research by checking case report forms against patient records or comparing sample records against the central study database.
