RTI has worked in more than 80 countries to implement more than 1,000 gender-related projects.

EXPANDING GLOBAL GENDER EQUALITY

Gender inequality is a global problem. No one should experience bias because of gender, especially when it comes to health, education, economic development, and political participation. RTI International is dedicated to ending gender disparities and inequalities. We formed the RTI Global Gender Center (GGC) specifically to address these issues.

RTI has worked in more than 80 countries to implement more than 1,000 gender-related projects. Working on behalf of government agencies, foundations, and donor organizations, we conduct culturally sensitive and socially relevant research in the United States, Latin America, Africa, Asia and the Pacific, and Europe.

LGBTQIA+ Rising is a working group of the RTI GGC. The RTI GGC's network of more than 500 RTI staff members and external affiliates spearheads efforts to solidify RTI as a leader in the advancement of lesbian, gay, bisexual, transgender, queer, intersex, and asexual (LGBTQIA+) research and programming at the local, national, and global levels. LGBTQIA+ Rising connects researchers and practitioners across RTI to collaborate on projects and programs that improve the health and well-being of LGBTQIA+ populations. Additionally, LGBTQIA+ Rising collects and shares resources, guidelines, and best practices in working with LGBTQIA+ populations to educate staff members and ensure RTI's work is inclusive of all sexual and gender minorities.

ECONOMIC EMPOWERMENT

Our researchers work to increase equal workforce opportunities and enable economic empowerment by engaging stakeholders at the local and governmental levels and conducting culturally sensitive skills training.

Project Highlights

- Trained male and female government workers and service providers in Indonesia to improve their management and leadership skills
- Increased employability of Kenyan youth who had not completed secondary school by improving job counseling and mentoring programs, and addressing gender-specific barriers
- Equipped top-performing young Liberian women and men for professional careers by developing undergraduate engineering and agriculture centers that prioritize inclusive programming
- Developed workforce opportunities and skills of youth in the Dominican Republic by providing monitoring and evaluation services

HEALTH & WELLNESS

Our work promotes opportunities to improve health and well-being, with an emphasis on substance use, HIV, and sexual and reproductive health issues that disproportionately affect women and gender-nonconforming individuals.

Project Highlights

- Conducted a multilevel HIV prevention study for adolescent girls and young women with stigma and discrimination reduction training in clinics in Pretoria, South Africa
- Improved maternal, neonatal, and child health services in Indonesia
- Determined that using ultrasounds in health centers reduces maternal, fetal, and newborn mortality rates in Sub-Saharan Africa
- Implemented an evidence-based intervention in South African health clinics for women living with HIV and using alcohol
- Evaluated three multipurpose technologies to prevent HIV and unintended pregnancy in Sub-Saharan Africa
- Identified better approaches to measure the benefits and social harms of microbicide use and to promote their uptake through knowledge dissemination
- Examined the association of criminal justice involvement with unmet health care needs of African American women who use substances

EDUCATING GIRLS & WOMEN

Our research helps create equal education opportunities by promoting gender-inclusive programming and safe learning environments for girls and women to remain in or return to school.

Project Highlights

- Improved reading skills in three local languages of primary-grade learners in Uganda
- Ensured retention in early grades through prevention of school-related and gender-based violence
- Strengthened early-grade reading and mathematics instruction, learning materials, and instructional approaches in Egypt
- Developed cost-effective national assessments for reading and mathematics as well as monitoring and reporting systems
- Adapted an intervention to prevent HIV among young women who have left school, and provided them with local education resources

ENDING GENDER VIOLENCE

Our comprehensive programs to prevent gender-based violence draw on our combined research expertise in sexual assault, intimate partner violence, teen dating violence, child maltreatment, and human trafficking.

Project Highlights

- Implemented evidence-based interventions for couples to increase partner communication skills and reduce violence and victimization in South Africa
- Developed, implemented, and evaluated interventions to reduce sexual assault in the U.S. Air Force
- Evaluated strategies to support male survivors of violence and disseminated lessons learned regarding implementation
- Developed and administered a U.S. campus sexual assault climate validation survey
- Developed a toolkit for integrating gender-based violence prevention and response into education projects
- Promoted safer early learning environments in Uganda through improved classroom and school management to reduce incidents of school-related and gender-based violence

Join us as we work to eliminate global gender inequality

Our center is made up of more than 500 affiliates working across RTI's many practice areas, including experts from local and global external organizations. This community of dedicated individuals brings an extensive range of skills and expertise from all subject areas to work toward a world of gender equality.

We work with a wide range of groups, including key populations of women, girls, and adolescents; the LGBTQIA+ communities; people who conduct sex work; couples; people who use substances, and people who are pregnant. Our work extends across all areas of gender disparity.
